

Summer Camp Academics

In order to keep the kids sharp and ahead of the curve when they go back to school, we implement 60 minutes of academic time daily.

Children who attend more than half of the Summer, 6 weeks or more, will review a Summer Brain Quest workbook based on the grades they are in between. During the hour of academic time, this is what they can work on.

All other children will have a few choices of what they would like to do during this time including:

- Jigsaw Puzzles
- Math Worksheets
- Logic Puzzles
- Reading Books
- Naps to Rest

We also do weekly STEM challenges for the children to collaborate on as a team as well as academic activities like Jeopardy, Blooket, Kahoot, and Scavenger Hunts with puzzle clues.
